Bring the beauty of the Kentucky countryside to your home, apartment complex, development or business. Now that it's available in vinyl, rail fence isn't just for the ranch anymore. When compared to cedar split rail fence, vinyl has been proven to be a safer alternative to wood since there is no risk of injury to children or pets from splinters. The vinyl fence you install today, will still look "good as new" years from now without the expensive upkeep required by other conventional fence materials.

Choose from a standard two, three or four rail; New England-style diamond rail; or the picturesque crossbuck style fence. Your dealer can help select the appropriate rail profile for your application. Accent any of these old standards with a wide variety of posts and caps, or enhance your fence with masonry pillars to complement your building, estate, or development.

Kroy Building Products also offers you a choice of price ranges for their post & rail profiles. Our top-of-the-line 100% virgin PVC post & rails carry a Transferable Limited Lifetime Warranty against rotting, rust, corrosion or abnormal discoloration due to weathering. These profiles and accessories are available in white for the pristine look of a painted surface, tan as an earth tone option or grey to offer the weathered look.

Kroy also offers their economical "Gold Series" post & rail system, which recaptures and utilizes PVC generated in the fabrication of fence products, and extrudes it with a virgin PVC outer layer. Gold Series products are available in white, and carries a Limited Lifetime Warranty. All products are durable and virtually maintenance free.
